

**Project title** Nature – the experiment of the unlimited possibilities

**Source of co-financing** Association of Communes RP Euroregion Baltic  
The Cross-border and Inter-Regional Small Grand Fund

Activity B: inter-regional cooperation (transfer of knowledge from the more developed regions to the less developed ones)

**Realization period** 01.10.2009 – 31.05.2010

**Total budget** 16 776 EUR  
**Co-financing quota** 14 259,60 EUR  
**Gdynia's contribution** 2 516,40 EUR

**Project target  
and planned results**

Nature - the experiment of the unlimited possibilities project partners are two science centres - EXPERYMENT Science Centre from Gdynia, Poland and NaturBornholm from Aakirkeby (Bornholm), Denmark - institutions active on the field of active education. Both science centres are implementing the edutainment (education + entertainment) ideas with their interactive exhibitions and other activities (lectures, workshops, "meetings" with science) for kids, youth and adults.

Nature - the experiment of the unlimited possibilities project aims: inter-regional cooperation (transfer of knowledge from the more developed regions to the less developed ones; promotion of regional and local development in Poland; ensuring the development of communication and development of systems for exchange of information; training of self-governmental administration in order to increase their professional skills).

The effect of the project: publication of the manual "Recipe for Nature", promoting methods of active education within the Science and eco-tourism.

**Project leader** Gdynia Innovation Centre, Budgetary Unit
